•Syracuse University *May 2019 – Now*
Research Assistant Syracuse, NY
- Advisor: Prof. Bryan S. Kim
- **Capacity-variant storage systems**: exploiting the tradeoffs among capacity, performance, and reliability (CPR) in SSDs for performance stability and aging-resilience (NSF Award # 2008453).
- **Self-learning storage systems**: imbuing intelligence to the storage devices so that they can self-learn, self-configure, and self-manage.
- **Next-generation storage stack with key-value / ZNS devices**: exploring the design of a storage stack using key-value / ZNS devices instead of traditional block devices.
